Subject: RE: PFAS sources and UCRM3 results

Laurence,

Great. I'll call you tomorrow at around 8.

Thank you,

Andy

Subject: PFAS sources and UCRM3 results

Laurence,

So we're still writing the paper about the geospatial analysis of PFAS sources and UCRM3 results and the question has come up about what was manufactured (or likely to be released) at each facility in the list below.

Ex. 5 Deliberative Process (DP)

Do you think that's right?

Is there any way to reference this?

And one more thing. Is there any way to classify each of these according to the emission route? Airborne or liquid effluents?

Probably the answer is "yes, both could have happened". I'm not optimistic that you will be able to help us.

We'll just have to blame it on TSCA (again).

Thanks,

Andy
